

Step 1: Enable 2-Step Verification

Google requires 2-Step Verification to generate an App Password.

1. Log in to your **Google Account**
2. Go to **Manage your Account** section
3. Go to the **Security** section of your Google Account.
4. Under "**How you sign in to Google**", enable **2-Step Verification** of your account.

Step 2: Generate a Google App Password

1. After enabling 2-Step Verification, return to the **Security** section.
2. Search and Look for the "**App Passwords**" option. If you can't find then go to '**2-Step Verification**' page and look for it.

Otherwise go to this URL:

https://myaccount.google.com/apppasswords?pli=1&rapt=AEjHL4Np242D_EmaTY5_gh5mUSFztj6qP4dEbuGrJPu8FJgrTkz05RPw-maQUPg7jJhzSJMRccjZel68rOemBNtyQ6vsjN3wgEyR3li9AZ_pdXfZIJBbXs

3. Give a App Name. (like example: Lenzflerstudio)
4. Click **Create** or **Generate**.
5. Copy the generated 16-character App Password. **Keep it secure** and give that to me.

App password should look like that:
